---

## PROFESSIONAL SUMMARY

Frontend Developer with hands-on experience building responsive and interactive web applications using HTML, CSS, JavaScript, React, and Tailwind CSS. Passionate about turning ideas into functional user interfaces, debugging issues effectively, and continuously learning new technologies. Strong team player, adaptable, and committed to professional growth in web development.

---

## TECHNICAL SKILLS

Languages	Frameworks & Libraries	Version Control	Tools & Platforms
HTML5	React	Git	VS Code
CSS3	Tailwind CSS	GitHub	Vercel
JavaScript			Chrome DevTools

## Other Skills

- Responsive design
- UI debugging
- State management
- Component-based architecture

---

## PROJECTS

### SaaS Landing Page

- Built a fully responsive landing page with React and Tailwind CSS
- Implemented reusable components for hero sections, feature cards, and call-to-action buttons
- Optimized for mobile and desktop using responsive design techniques
- Debugged routing issues and enhanced navigation with React Router

## **Testimonials Component**

- Created a React carousel component for testimonials with automatic sliding and pause-on-hover
- Managed state using useState and lifecycle effects using useEffect

## **SmartFitness Website (Personal Project)**

- Integrated Firebase for user authentication and data storage
  - Built interactive UI sections such as workouts, progress tracker, and responsive menus
  - Implemented clean code practices and structured folder organization
-
